**Financial risk management:**

The Company's financial risks include market risk, credit risk, and liquidity risk. The Company has established a control system to ensure a reasonable balance between the costs incurred from risks and the costs of risk management. The Board of Management is responsible for monitoring the risk management process to ensure a reasonable balance between risk and risk control..

**Market Risk**

The Company's business operations are primarily subject to risks arising from changes in prices, foreign exchange rates, and interest rates.

**Price Risk:**

The Company faces price risk related to equity instruments arising from short-term and long-term investments in equity securities due to

the uncertainty of future prices of equity investments. The long-term equity investments are held for strategic purposes, and at the end of the quarter, the Company has no plans to sell these investments.

#### Foreign exchange rate risk:

The Company faces foreign exchange risk as the fair value of future cash flows from a financial instrument will fluctuate with changes in foreign exchange rates when loans, revenues, and expenses of the Company are denominated in currencies other than the Vietnamese Dong.

#### Interest rate risk:

The Company faces interest rate risk as the fair value of future cash flows from a financial instrument will fluctuate with changes in market interest rates when the Company has demand deposits or term deposits, loans, and debt subject to floating interest rates. The Company manages interest rate risk by analyzing competitive market conditions to obtain favorable interest rates aligned with the Company's objectives.

#### Credit risk:

Credit risk is the risk that a counterparty involved in a financial instrument or contract will not be able to fulfill its obligations, resulting in financial loss to the Company. The Company faces credit risks from its business operations (mainly from trade receivables) and financial activities (including bank deposits, loans, and other financial instruments).

#### Liquidity risk:

Liquidity risk is the risk that the Company may face difficulties in fulfilling its financial obligations due to a lack of capital. The Company's liquidity risk primarily arises from the mismatch in the maturity dates of its financial assets and liabilities.

Payment terms of financial liabilities based on the estimated payments under the contract (based on the cash flow of principal amounts) are as follows:

|                                           | From 1 year or<br>less<br>VND | Over 1 year to 5<br>years<br>VND | Over 5 years<br>VND | Total<br>VND       |

The Company believes that the risk concentration for debt repayment is low. The Company is able to meet its current debt obligations from cash flow generated by business operations and funds received from maturing financial assets.

#### a. Events after the end of the quarter:

No material events occurred after the financial statements were prepared that require adjustments or disclosure in the financial statements.

#### b. Segment reporting:

The business segment includes divisions based on operating field

A business segment is a distinguishable segment of the Company engaged in the production or provision of individual products or services, or a group of related products or services, that has risks and economic benefits distinct from those of other business segments.

#### Segment Information

| Indicator                                                            | Finished goods | Merchandise | Supplies | Services           | Total                  |
|----------------------------------------------------------------------|----------------|-------------|----------|--------------------|------------------------|
| Revenue from goods sold and services rendered by segment             |                | -           | -        | 1,442,494,034      | 1,442,494,034          |
